Assignment 1 Rubric

Total Points: 10

You may not use any special tools to create your pages. Graders will view the source code and verify that you wrote the HTML and CSS directly.

1. Hyperlinks – 2 points: There are three (3) links. Students should implement the links by having three (3) of them all point to a single web page (page2.html) at your site. The single web page should be divided into three portions, each separated by a horizontal rule or white space. Each target anchor should be labelled accordingly.
2. Layout – 3 points: All components (text, font, borders) were properly placed.
3. Font style, size and color – 2 points: if there is no big difference from the JPG image, you get 1 point for each component.
   > The grader will load your page using the Firefox browser and set the page to the same size as the JPG image (lawyer.jpg) in the assignment's description.

4. CSS – 3 points: Layout uses CSS to imitate page as closely as possible, including vertical scrolling and background images.

   IMPORTANT
   - These grading guidelines are provided for your guidance. If any issue is not explicitly covered, you may discuss it on Piazza.
